December 6 9 <sup>th</sup> New Moon Monday	December 13 Sabbath Monday	December 20 Sabbath Monday	December 27 Sabbath Monday	

Special Note: The Sabbaths for the month of May were extremely close to being on Friday. Conjunction occurs on May 13 at 9:05 p.m. and according to the information found at the US Naval Observatory website ([http://aa.usno.navy.mil/cgi-bin/aa\\_pap.pl](http://aa.usno.navy.mil/cgi-bin/aa_pap.pl)) sunset occurs on May 13 at 8:28 p.m. and the end of civil twilight is at 8:58 p.m. Thus, the new day begins at 8:58 p.m. only 7 minutes prior to conjunction time. This places conjunction after the day has begun yielding a two day new moon on May 14 (Saturday) and May 15 (Sunday).

### **CONJUNCTION TIMES (Eastern Standard Time)**

---
